

Lipoedema UK Board

CHAIR, Sharie Fetzer

Sharie's frustration at the lack information on suitable treatments for Lipoedema and her desire for more research into the way it effects every aspect of peoples lives, led her to originate the idea for Lipoedema UK's Big Survey. Passionate about raising awareness amongst the medical professional to ensure that lipoedema is diagnosed as early as possible, Sharie is especially proud of working with the Royal College of GP's (RCGP's) to develop Lipoedema UK's and the RCGP's elearning course on Lipoedema. Professionally Sharie's managerial roles included working for a leading firm of occupational psychologists and major retailer.
