

Feedback from Surgeon & Speaker Anne Dancey <https://www.annedancey.co.uk/>

*“This weekend I had
the honour of
presenting my
thoughts on
liposuction for
lipoedema patients
at the Talk
Lipoedema meeting
in Birmingham*

This well attended event gave me the opportunity to inform and engage on a health subject with increasing public and media interest. The knowledge gap in our understanding of fat tissue disorders in the United Kingdom is significant and we do not have all the answer to address the many legitimate concerns of sufferers. However, patient advocate groups are self-evidently doing a tremendous job at meetings like this in pushing this important issue for women.”
